

DIGITAL FUTURES INITIATIVE

Program Request Form

Dear School Board, Superintendent and/or Principal,

Technology is changing at an extremely fast pace. There are numerous benefits and challenges of “being digital” and I would like you to consider incorporating the free content from Digital Futures Initiative into our schools.

Digital Futures Initiative is a non-profit partnership between schools, law enforcement and the private sector coming together to provide the best information for our students and parents to be better digital citizens, be safe, responsible and make better informed decisions in their digital life.

Built on a foundation of the importance of emotional intelligence, the programs are built to meet education standards and have been taught in schools since 2009. By incorporating these digital life skills into your curriculum, you will be educating students and empowering parents – together - in an ever-connected world.

To learn more about the Digital Futures Initiative in-class lessons or the Parent Academy, visit DFINow.org or email info@dfinow.org

Thank you,

Parent
